CONTINUATION SHEET	Reference No. of Document Being Continued PIIN/SIIN DAAE07-02-D-S002 MOD/AMD P00008	Page 2 of 2
Name of Offeror or Contractor: HEIL TRAILER INTERNATIONAL		

SECTION A - SUPPLEMENTAL INFORMATION

1. The purpose of this modification P00008 is to incorporate 4 Request for Deviation/Waiver into contract DAAE07-02-D-S002.

2. The following Deviations are approved and incorporated into the contract by reference at no additional cost.
 - a. Deviation Number D003:

DESCRIPTION OF DEVIATION/WAIVER: Approves the change design of ladder step from two piece flat bar with assent and dessent of vehicle.

NEED FOR DEVIATION/WAIVER: Increases safety while using ladder by improving grip of ladder rung. No degradation to overall vehicle performance requirements.

 - b. Deviation Number D004:

DESCRIPTION OF DEVIATION/WAIVER: Change to non-CARC MIL-P-14105 heat resistant paint for lower half of engine surgaces. Upper portion of engine (cylinder heads, valve covers, injector system, cooling fan, alternator) not painted and remain natural finish eliminating possibility of fume emmission and aid engine cooling.

NEED FOR DEVIATION/WAIVER: CARC paint as currently applied to entire surface of APU engine may emit unpleasant and/or dangerous fumes when heated above 400 deg F. Operating personnel may be exposed to fumes. CARC paint of entire engine adversely affects air cooling by retaining engine heat.

 - c. Deviation Number D005:

DESCRIPTION OF DEVIATION/WAIVER: Replace self adhesive non skid strips with Hentzen 03884GMZ-PA. Green 383 Non-Skid Zenthane CARC coating conforming to A-A-59166, Type II. Area affected - the entire walkway area, top of tank trailer, between roll over rails, approximately 68 sq. ft.

NEED FOR DEVIATION/WAIVER: Self adhesive non skid strips do not bond sufficiently to CARC paint and peel off walkway area.

 - d. Deviation Number D006:

DESCRIPTION OF DEVIATION/WAIVER: Change method of securing pipe flange to discharge side of APU pump; from (8) 625-11 x 2.8" threaded studs to (8) .625 - 11 x 1.5" GR 8 capscrews. Function & performance of pump is not affected. Grade 8 capscREW specified is equal to original threaded stud grip length and torque. Pump maintainance/servicing will be improved.

NEED FOR DEVIATION/WAIVER: Pump pipe flange is diffiicult to align & install on (8) threaded studs within the confined area of the APU enclosure. Studs may also work loose when removing flange nuts for pump service. Bolts simplify inistallation and future service of pump flange.

3. Except as provided for herein, all contract terms and conditions remain unchanged and in full force and effect.

4. As a result of this modification, the contract amount remains unchanged.

*** END OF NARRATIVE A 013 ***
